6 presenting an organ list of associated organs corresponding to the selected report
7 type;

8 for each associated organ presenting a list of applicable medical descriptions and
9 receiving a selected applicable medical description, wherein the selected applicable medical
10 description is associated with said each associated organ; and

11 outputting a patient report comprising the medical descriptions of the associated
12 organs in the selected report type.

1 25. (Previously presented) The method of claim 24, wherein the steps of
2 receiving each includes receiving input from an operator.

1 26. (Previously presented) The method of claim 24, further comprising
2 receiving a composed medical description and associating the composed medical description to
3 one of the associated organs corresponding to the selected report.

1 27. (Currently amended) The method of claim 26, wherein receiving a
2 composed medical description includes editing a supplied standard medical description.

1 28. (Currently amended) The method of claim 26, wherein receiving a
2 composed medical description includes receiving a user provided ~~comments~~description.

29-30. (Canceled)

1 31. (Currently amended) The method of claim 30, wherein the list of reports
2 types is presented in a pop-up menu.

1 32. (Currently amended) The method of claim 25, wherein the list of supplied
2 applicable medical descriptions is presented in a pop-up menu.

1 33. (Previously presented) The method of claim 24, wherein outputting a
2 patient report includes printing out the patient report.

1 34. (Previously presented) The method of claim 24, wherein outputting a
2 patient report comprises displaying the patient report on a computer screen.

1 35. (Previously presented) The method of claim 24, wherein the organ list is
2 presented in its entirety on a screen.

1 36. (Previously presented) The method of claim 24, further comprising
2 generating a billing report associated with the selected report.

1 37. (Currently amended) A computer system for generating a patient report,
2 comprising:

3 a system configured to display an on-screen menu comprising a list of pre-defined
4 reports types, each report type containing supplied medical descriptions of organs associated
5 with said each report type;

6 a system configured to receive selection information indicative of a selected
7 report type;

8 a system configured to display an ~~on~~-on-screen organ list of associated organs
9 corresponding to the selected report type and to display a list of applicable medical descriptions
10 for each associated organ;

11 a system configured to receive information indicative of a medical description for
12 at least one of the associated organs corresponding to the selected report type; and

13 a system configured to output a patient report comprising the ~~selected report~~
14 medical descriptions of the associated organs in the selected report type.

1 38. (Currently amended) The computer system of claim 37, wherein the
2 system configured to receive information indicative of a medical description is further
3 configured to permit an operator to select one of the supplied standard medical descriptions for
4 each organ.

1 39. (Currently amended) The computer system of claim 38, wherein the ~~[[a]]~~
2 system configured to display an ~~on~~-on-screen organ list of organs associated ~~organs with a report~~
3 type is further configured to display the applicable supplied medical descriptions in a pop-up
4 menu.

1 40. (Currently amended) The computer system of claim 37, wherein the
2 system configured to display an on-screen menu comprising a list of reports types is further
3 configured to receive from a user a composed medical description for one of the associated
4 organs.

1 41. (Currently amended) The computer system of claim 37, wherein the ~~[[s~~
2 ~~]]~~system configured to display an on-screen menu comprising a list of reports types is further
3 configured to display the list of reports types in a pop-up menu.

1 42. (Currently amended) The computer system of claim 37, wherein the ~~on~~
2 on-screen organ list of associated organs is displayed in its entirety on a single computer screen.

1 43. (Currently amended) The computer system of claim 37, further
2 comprising a system configured to generate a billing report of the associated organs
3 corresponding to the selected report type, wherein a billing entry is made for each of the
4 associated organs.

1 44. (Currently amended) A computer user interface for generating a patient
2 report, comprising:

3 a first screen presenting an operator with a menu of selectable pre-defined reports
4 types, each report type containing medical descriptions of organs associated with said each report
5 type; and

6 a second screen presenting the operator with an ~~on~~-on-screen organ list of one or
7 more organs associated with a selected one of the reports types, wherein a menu of selectable
8 supplied standard medical descriptions is provided for each of the associated organs, the second
9 screen being presented in response to the user selecting one of the reports types; and

10 a selection to output a patient report comprising the medical descriptions of the
11 associated organs in the selected report type.

1 45. (Currently amended) The method of claim 24, wherein the ~~organ-list~~list of
2 organs in the patient report comprises a subset of an organ list corresponding to the ~~list of~~ reports
3 type.

1 46. (Currently amended) The computer system of claim 37 , wherein the
2 ~~organ-list~~list of organs in the patient report comprises a subset of an organ list corresponding to
3 the ~~list of~~ reports type.

1 47. (New) The user interface of claim 44, wherein the list of organs in the
2 patient report comprises a subset of an organ list corresponding to the report type.

1 48. (New) The method of claim 24, wherein the pre-defined report types may
2 be customized by the operator.

1 49. (New) The computer system of claim 37, wherein the pre-defined report
2 types may be customized by the operator.

1 50. (New) The computer user interface of claim 44, wherein the pre-defined
2 report types may be customized by the operator.
